Urgent Care Plan

Coordinate My Care QR Code

CMC has developed a QR code to make it easier and quicker to access the CMC website.

This QR code was first championed by LAS who use these routinely for efficiency.

When scanned, the code directs the user to the CMC website where they can access information about joining CMC, training and resources. The QR code also provides a visual reminder for users to access CMC for patients.

Tips for use

- 1. Can be added to leaflets in GP practices, acutes, community centres, anywhere using CMC**
- 2. Can be downloaded onto mobile devices by patients who have a CMC plan so that they can alert services they access, including urgent care services**
- 3. Can be created into support collateral such as fridge magnets and wristbands**
- 4. Can be printed onto stickers and added to patient paper notes**
- 5. Can be placed as a door sticker e.g. in care/nursing homes and hospices, for patients who have a CMC care plan so that staff and urgent care services are aware**
